

For almost three decades our roofing family has been committed to delivering reliable and professionally installed roof systems throughout California. From the more conventional built-up, torch-applied or sloped roofing systems, to the newest lines of PVC and TPO, emulsion, acrylic or silicone coating systems, we can recommend and install the right system for your building or complex. Our resources and expertise have allowed us to overcome every challenge presented to us.

ALTA CREWS ARE TRAINED TO INSTALL THE FOLLOWING SYSTEMS:

- ✔ Single-Ply (TPO, PVC and EPDM)
- ✔ Built-Up (formerly Tar and Gravel)
- ✔ Modified Bituminous (SBS and APP)
- ✔ Green or Vegetative Roofs
- ✔ Composition Shingle
- ✔ Wood Shakes and Shingles
- ✔ Clay, Concrete and Slate Tile

In order to continue meeting the needs of building owners and property managers, we have continued to evolve with the advancements of roofing technology. Be it the ever changing California Energy Code (Title 24), evolution of wind uplift requirements or new ASTM standards, we pride ourselves on keeping up with the times.

ROOF REMOVAL

When installing a new roof on an existing building, it is often times necessary to remove the existing deteriorated roof. Our crews are trained to safely and efficiently remove roof membranes. This service includes the ability to remove asbestos containing roof membranes as we are certified with California.

ALTA IS APPROVED TO INSTALL ALL MAJOR BRANDS, INCLUDING:
